

Identify your strengths and use that knowledge to choose a satisfying career path.

AchieveWorks[®] Aptitudes is written for students from 8th to 12th grade. It has eight sections that use multiple approaches to measure each aptitude within a set time limit. Three aptitudes have two parts that measure different aspects of that aptitude.

After finishing an aptitude section you'll receive a short report that tells you more about the aptitude, ways to grow, and related careers. As sections are completed you can review a list of best-fit careers based on your results.

Computation 13 min

$8 + 2 =$

6
 7
 10
 11
 Don't know

The ability to perform basic math calculations quickly and accurately.

Fluid Reasoning 8 min + 10 min

Select the option that should come next in the series.

 
 
 
 Don't know

The ability to think flexibly in order to recognize and predict patterns in information.

Logic 15 min

Alex, Bella, Carl, and Dana are sitting on the same bench, but not necessarily in that order. Bella is **not** next to Dana. Dana is **not** next to Carl. Carl is somewhere to the right of Alex. Carl has only one person next to him.

Who is to the immediate left of Bella?

Alex
 Carl
 Dana
 Nobody
 Don't know

The ability to solve complex problems through deductive reasoning.

Mathematical Reasoning
15 min
