AchieveWorks Assessments Win 2026 CODiE Award for Best Research Solution

*Award-winning student-centered career research solution
provides personalized career recommendations*

FOR IMMEDIATE RELEASE

Marlborough, CT (August 19, 2026) Human eSources®, provider of online career assessments for education and talent and recruitment solutions for employers, announced that AchieveWorks® was named the winner of the 2026 CODiE Award for Best Research Solution. The CODiE Awards are among the technology industry's longest-running and most respected honors, recognizing excellence and innovation across education and business technology.

The award recognizes the best research and development database solution that allows users to quickly reference materials, content, and links for educational purposes. Statistical analyses and empirical research support AchieveWorks assessments, which include AchieveWorks Personality, AchieveWorks Intelligences, AchieveWorks Skills, and AchieveWorks Aptitudes. Each assessment is tailored for 8th to 12th grade students and is backed by published research that educators and counselors have confirmed through firsthand student and classroom experience. This is the second CODiE award for AchieveWorks Intelligences and the second award for AchieveWorks Skills.

"This recognition validates the years of research our team has invested in building quality education and career assessments that schools can trust," said Ross Dickie, Human eSources President and COO.

"Winning Best Research Solution affirms that when we help a student understand their personality, intelligences, skills, aptitudes, and career options, that insight is grounded in real, replicable evidence."

AchieveWorks assessments are available and used in tens of thousands of schools across North America and 130 countries abroad, helping students and counselors chart academic and career pathways backed by validated research. Each assessment illuminates a different dimension of who a student is to create a student-centered career research solution that goes far deeper than any single tool could achieve alone. The complementary assessments use Human eSources Career Matching Technology™ to draw on hundreds of data points across all four assessments to generate personalized career recommendations. Student career matches are refined as each assessment is completed. All results feed into a common Career Center powered by O*NET and Indeed, where students can research 900+ occupations, compare their personal profile against specific career requirements, explore related educational programs, and rate and save top choices to their personal portfolio. The assessments can be accessed directly from Human eSources or through a network of career and education partners.

Details about Human eSources' AchieveWorks assessments are available at humanesources.com/achievements.

This year's CODiE Awards program evaluated products across 75 categories with more than 400 expert reviewers. Winners are selected through a rigorous evaluation process led by independent industry experts who assess each solution based on innovation, functionality, market impact, and overall value.
