Help students develop critical skills for college and career readiness
Research has shown that students who develop soft skills are more college ready and employable. AchieveWORKS® Skills measures conscientiousness, creativity, critical thinking, leadership and social-emotional complex skills. Each of these skills is comprised of 5 skill facets, so students can target specific areas that offer the best opportunities for development. The AchieveWORKS Skills online assessment is written and normed for secondary school students and takes less than 20 minutes to complete.

Professionals can track student progress, view and manage student information, access detailed reporting and find support within AchieveWORKS Professional Tools. Easily see the resulting composition of all, or a subset, of students with aggregate reporting and filters. Chart skill development through multiple results over time. Best of all, it’s affordable, easy to use, requires no special credentials and includes excellent customer support!

- Discover and develop students’ skills with advice from the in-depth, personalized report
- Compare student results to individual careers to address job fit and any gaps
- Help students better understand their strengths and challenges and create actionable plans
- See personalized career recommendations based on an analysis of student results and 1,800 data points
- Easy to read, interactive report includes badges earned as students complete activities and interact with the report
- Access online at any time, from anywhere, using any device

Over 20 years helping students discover their unique strengths, talents and preferences to chart meaningful and satisfying educational and career paths.
